About Me

I'm Herman, a student who is enthusiastic about the development of technologies. I'm currently curious about technology interacting with each other through API and how to optimize it.

Education

Universitas Airlangga - Data Science   **July 2022 - Present**
- 3rd place at *Synreach volleyball* competition.

Organization

Staff of Dataquest - Airnology   **Sep 2023 - Oct 2023**
- Contribute to design main ideas for competition
- Scraping and Labeling images over 500++
- Set up kaggle environment for final competition

Skills

Language : Indonesia (Mother Language), English (460 score in ELPT-UNAIR)
Programming : Python (Pandas, Numpy, etc), Javascript (Express Js, React Js), and, Database (MySQL, MongoDB)

Projects

Analisis A/B Testing untuk Meningkatkan Pendapatan Situs Web
- Success to implement basic concepts of data science life cycle.
- Make simple visualization for data understanding.
- Draw conclusions based on a statistical approach.

News Aggregator
- Implementation of core ReactJS concepts following best practices in development.
- Application of state, hooks, and props to create a responsive and interactive user experience.
- integration of a simple API to dynamically present news content.
- Utilization of basic React Router concepts for dynamic page navigation.
